

Providing the Midwest the Energy Solutions They Need for Increased Efficiency and Cost Savings

For decades, the in-house technical staff at EMCOR Construction Services Midwest (ECS Midwest) has been implementing smart, highly advanced energy solutions for schools, government facilities, and other public institutions. From retro/recommissioning to complete HVAC renovation, facility automation to photovoltaics, we are a single-source for all your energy needs.

Core Services—Designed for Maximum Performance.

- » Energy Solutions
 - Guaranteed Savings Contracts
 - Solar Services
- » Water/Wastewater Services
- » Commissioning/Recommissioning
- » Mechanical Services
- » Electrical Services

Innovative Energy Solutions for Maximum Savings

Every facility is unique and requires a customized energy solution that meets its specific needs, drivers, and goals. Our team of experienced engineers and technicians have the training needed to apply creative solutions.

When you work with ECS Midwest, we prepare a summary of suggested implementation strategies tailored to your facility and designed to reduce annual utility consumption and operating expenses. We prioritize each suggestion by its expected boon to operational performance and financial benefit, so that you can make informed investments.

Our Energy Solutions include:

- » Energy saving initiatives
- » Solar programs and renewable systems
- » Energy audits
- » Engineering and design
- » Lighting, mechanical/HVAC, and water system retrofits
- » Electrical upgrades and service
- » Occupied space renovations and tenant improvements
- » Preventive maintenance programs
- » Building automation systems
- » Load and critical equipment monitoring
- » Building envelope services
